Formstack Integration Data Guide

UN LOCK™

The Formstack Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion.

Lead Standard Fields

Lead Standard Fields are fields that are part of the standard Lead Object in Formstack. These fields will always populate if they are available and require no additional configuration. These fields are provided for all HRAs.

Formstack Lead Standard Field Name	Formstack Field Type	HRA Families	Unlock/HealthAware Field Name	Medicom Field Name	Expected Values	Description
Name	Name	All	first_name, last_name	first_name, last_name	1- 100 character name	The name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
FirstName	Text	All	first_name	first_name	1-50 character first name	The first name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
LastName	Text	All	last_name	last_name	1-50 character last name	The last name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
Address	address	All	address_1 address_2 City State Zip_code	address_1 address_2 City State Zip_code	Full Address Name	The Full address of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
street_address	Text	All	address_1 address_2	address_1 address_2	Address 1 & 2 Name	The street address of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
City	Text	All	city	city	city name	The city of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
state	Text	All	state	state	2 letter state initial in uppercase, ISO format ex: 'MN'	The 2 character state abbreviation of the US state for the consumer. Based on client customization, this field may be optional or hidden. The integration checks for StateCode first to determine if State and Country picklists have been enabled and if so, writes to the StateCode field, otherwise it adds the 2 letter state code into the state field directly.
zip_code	Text	All	zip_Code	zip_Code	5 digit string	The 5 digit zip code of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
date_of_birth	datetime	All	date_of_birth	date_of_birth		The date of birth of the consumer. Format YYYYMMDD
phone	Phone	All	phone_1	phone_1	10 digit string	The 10 digit phone number of the consumer (US based number assumed).
utm_source	text	All	source	source	String from URL	This is the data that was passed to the HRA in the utm_source parameter. For Medicom HRAs, the s parameter is also able to be used.
Email	Email	All	email	email	email address	The email address of the consumer.
marketing_opt_in	checkbox	All	marketingOptIn	marketingOptIn	Unchecked = false	Indicates if the consumer has opted-in to receive email marketing

Formstack Integration Data Guide

UN LOCK ™

The Formstack Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion.

Lead Custom Fields - Unlock HRA Specific

Lead Custom Fields are fields that can be added to the Lead Object in Formstack by an Administrator. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.

HRA Data Name	Expected Data Values	Data Label	Description
primaryResult (from Acid Reflux HRA)	'SERIOUS_SYMPTOMS_REPORTED' 'DIAGNOSED_SYMPTOMATIC' 'UNDIAGNOSED_INCREASEDRISK' 'UNDIAGNOSED_SYMPTOMATIC' 'DIAGNOSED_ASYMPTOMATIC' 'UNDIAGNOSED_ASYMPTOMATIC'	Seek Medical Attention See a Doctor About Symptom Control See a Doctor for Evaluation Ask a Doctor About Your Symptoms Symptoms Well-Controlled GERD Not Likely	The primary result from the Acid Reflux HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
primaryResult (from Anxiety HRA)	'RECOMMENDED' 'NOT_RECOMMENDED_SYMPTOMATIC' 'NOT_RECOMMENDED_ASYMPTOMATIC'	Anxiety assessment recommended Tell a doctor about your symptoms Keep a symptom journal	The primary result from the Anxiety HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
