WebMD Ignite Integration Data Guide

The WebMD Ignite Integration is supported for all Unlock, Medicom, and HealthAware HRAs. All data is written to the Activity API with a new Activity object created for each HRA completion. For more information about this integration, please refer to the "WebMD Ignite - Unlock HRAs Integration" document.

Activity Standard Fields

Activity Standard Fields are fields that are part of the standard Activity object in WebMD Ignite. These fields are provided for all HRAs.

Activity Field Name	Activity Field Type	HRA Families	Unlock/HealthAware Field Name	Medicom Field Name	Expected Values	Description
source	String	All	source	source	medicom healthaware	This is a static value that can be set during the integration setup. The Lead Source value is not required, but we recommend setting this to a known picklist value that represents the HRAs. Use the API name for the picklist option when setting this value.
activityId	String	All	connection_id	connection_id	UUID value unique to that user's session.	Arbitrary ID unique within the source application. If the activity is re-submitted, the activityId must be the same
activityType	String	All	N/A	N/A	hraSubmit	Code which determines the schema the rest of the activity will be validated against. Must be set to "hraSubmit"
activityDate	String	All	N/A	N/A	Created Date as a string	An ISO formatted datetime string - when the activity started. Timezone should be in UTC
activitySource	String	All	source	source	Medicom HealthAware	Code identifying the source application that provided the activity data.
visitorExternalId	String	All	connection_id	connection_id	UUID value unique to that user's session.	Arbitrary ID unique within the source application. If the activity is re-submitted, the activityId must be the same
firstName	String	All	firstName	firstName	1-50 character first name	The first name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
lastName	String	All	lastName	lastName	1-50 character last name	The last name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
dateOfBirth	String	All	date_of_birth	date_of_birth	Date of Birth as a string. Format is yyyy-mm-dd	The date of birth of the consumer.
addressLine1	String	All	address	address1	address	The street address of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
city	String	All	city	city	city name	The city of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
state	String	All	state	state	2 letter state initial in uppercase, ISO format ex: 'MN'	The 2 character state abbreviation of the US state for the consumer. Based on client customization, this field may be optional or hidden.
postalCode	String	All	zipCode	zipCode	5 digit string	The 5 digit zip code of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
homePhone	String	All	phone	phone1	10 digit string	The 10 digit phone number of the consumer (US based number assumed). Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
genderCode	String	All	sex	gender sex	F M	The consumer's sex at birth. This should not be confused with gender. The data captured within the HRA is "Sex at Birth" and should not be used for any gender identity purposes.
emailAddress	String	All	email	email	email address	The email address of the consumer.
LandingPageUrl	String	All	current_url	current_url	*Example: http://example.com/example?hgcrm_channel =email&hgcrm_source=healthgrades&hgcrm _agency=healthgrades&hgcrm_campaignid= 12&hgcrm_tacticid=1277&hgcrm_trackingseti d=2123&utm_source=test1&utm_campaign= test3&utm_term=test4&utm_content=test5& utm_medium=test2&hgcrm_promoted_facility =02&hgcrm_promoted_serviceline=01*	The full URL to the HRA including all parameters. This field is inspected for CRM tracking parameters and should be decoded to plain text.
formData	object	All	(various)	(various)		This section includes all additional data points captured by the HRA (including any custom questions) not already outlined in...

						HRA (including any custom questions) not already outlined in the WebMD Ignite Activity template, provided in JSON format. For details about field definitions for each individual HRA, please refer to that HRA's Data Dictionary.
hraPrimaryResult	String	All	*N/A*	*N/A*	See attached tabs hraPrimaryresults by source	Primary outcome of the HRA
LocationCode	String	All	location	location	*A string of the name of the HRA location label from the HRA Console.*	This is the location name shown in the HRA Console. With logic to replace space with underscore
LocationName	String	All	location	location	*A string of the name of the HRA location label from the HRA Console.*	This is the location name shown in the HRA Console.
assetId	String	All	app_type_key	app_type_key	diabetes covid_v3 bc_v3 bc healthyweight_v3 cvd stroke_v3 bladderaware kneehip_v3 substance_use copdaware acidreflux_v3 spine_v3 sleep_v3 colon_v3 coloncanceraware strokeaware depression_v3 anxietyaware lung_v3 pad_v3 prostate_v3 diabetesaware routing_page anxiety_v3 shoulder_elbow prostatecanceraware depressionaware sleepaware weightaware vascularaware gerdaware spineaware weightloss_v3 bcscreening_v3 breastcanceraware bladdercontrol_v3 diabetes_v3 jointaware_kneehip lungcanceraware heartaware cvd_v3	The ID of the HRA

WebMD Ignite Integration Data Guide

The WebMD Ignite Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Health Aware HRAs vs. Medicom Health HRAs, etc.). All data is written to the Activity API with a new Activity object created for each HRA completion. For more information about this integration, please refer to the "WebMD Ignite - Unlock HRAs Integration" document.

HRA Primary Results - Unlock HRA Specific

Activity fields are fields that can be added to the Activity Object in WebMD Ignite. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.

HRA Type	Description	Expected Data Values	Data Label
Acid Reflux	The primary result from the Acid Reflux HRA. It is backwards compatible with both Medicom and HealthAware HRAs.	'serious_symptoms_reported'	Seek Medical Attention
		'diagnosed_symptomatic'	See a Doctor About Symptom Control
		'undiagnosed_increasedrisk'	See a Doctor for Evaluation
		'undiagnosed_symptomatic'	Ask a Doctor About Your Symptoms
		'diagnosed_asymptomatic'	Symptoms Well-Controlled
		'undiagnosed_asymptomatic'	GERD Not Likely
Anxiety	The primary result from the Anxiety HRA. It is backwards compatible with both Medicom and HealthAware HRAs.	'recommended'	Anxiety assessment recommended
		'not_recommended_symptomatic'	Tell a doctor about your symptoms
		'not_recommended_asymptomatic'	Keep a symptom journal
Back & Neck	The primary result from the Back & Neck HRA. It is backwards compatible with both Medicom and HealthAware HRAs.	'no_impairment'	No Spine Impairment
		'mild_impairment'	Mild Spine Impairment
		'moderate_impairment'	Moderate Spine Impairment
		'severe_impairment'	Severe Spine Impairment
		'other_symptoms_reported'	See a Doctor Soon
		'incontinence_symptoms'	Seek Medical Attention
		'meningitis_or_heart_symptoms'	Seek Immediate Medical Attention
Bladder Control	The primary result from the Bladder Control HRA. It is backwards compatible with both Medicom and HealthAware HRAs.	'has_worrisome_urinary_symptoms'	Prompt Medical Evaluation Recommended
		'greatly_bothered_by_stress_leaks'	Treatable Control Problems Identified
		'has_urge_or_stress_leaks_or_frequent_urination'	Treatable Bladder Problems Identified
		'has_leaks_not_related_to_urge_or_stress'	A Medical Evaluation Is Needed
		'no_leaks_or_frequent_urination'	No Bladder Control Problems Reported
Breast Cancer	The primary result from the Breast Cancer HRA. It is backwards compatible with BreastCancerAware from HealthAware and the Breast Cancer Screening HRA from Medicom Health, but NOT the deprecated Breast Cancer Risk HRA from Medicom Health.	'genetic_screening_recommended'	Screening for Genetic Risk Factors Recommended
		'genetic_rescreening_recommended'	Re-screening for Genetic Risk Factors Recommended
		'screening_recommended'	Schedule Screening Now
		'follow_recommended_screening'	Follow Your Doctor's Recommended Screening Schedule
		'discuss_future_screening'	Ask Your Doctor When You Should Begin Screening
		'continue_annual_screening'	Continue Annual Screening
		'continue_recommended_screening'	Continue Recommended Screening Schedule
Colon Cancer	The primary result from the Colon Cancer HRA. It is backwards compatible with ColonCancerAware from HealthAware but NOT the Colon Cancer HRA from Medicom Health due to scientific improvements.	'monitoring_rec_existing_crc'	Personal Cancer History - Monitoring Recommended
		'discuss_symptoms'	Discuss Symptoms with a Doctor
		'discuss_screening_schedule'	Discuss Screening Schedule with a Doctor
		'schedule_routing_screening_now'	Schedule Routine Screening Now
		'continue_routine_screening'	Continue Routine Screening
		'above_rec_screening_age'	Above Recommended Age for Screening
		'below_rec_screening_age'	Below Recommended Age for Screening
COPD	The primary result from the COPD HRA. It is backwards compatible with the COPDAware HRA from HealthAware. Medicom Health does not have a compatible HRA.	'manage_existing_copd'	Manage Your COPD With Your Doctor
		'discuss_existing_copd'	Talk to a Doctor About Your COPD
		'screening_recommended'	Screening Recommended
		'screening_may_be_recommended'	Screening May Be Recommended

		'discuss_symptoms'	Tell a Doctor About Any Symptoms
Depression	The primary result from the Depression HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.	'recommended'	Depression Assessment Recommended
		'not_recommended_symptomatic'	Tell a Doctor About Your Symptoms
		'not_recommended_asymptomatic'	Keep a Symptom Journal
Diabetes	The primary result from the Diabetes HRA. It is backwards compatible with DiabetesAware from HealthAware but NOT the Diabetes HRA from Medicom Health due to scientific improvements.	'existing_diabetes'	Existing diabetes
		'very_high_risk'	Very high risk
		'high_risk'	High risk
		'moderate_risk'	Moderate risk
		'more_info_needed'	More info needed
		'low_risk'	Low risk
Heart	The primary result from the Heart HRA.	'existing'	High Risk - Existing Condition
		'highnearterm'	High Near-term Risk
		'highlongterm'	High Long-term Risk
		'moderate'	Moderate Risk
		'increased'	Increased Risk
		'low'	Low Risk
		'unknown'	Unknown Risk
Knee & Hip	The primary result from the Knee & Hip HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.	'no_problems'	No Significant {joint} Problems
		'mild_problems'	Mild to Moderate {joint} Symptoms
		'moderate_problems'	Moderate to Severe {joint} Symptoms
		'severe_problems'	Severe {joint} Symptoms
Lung Cancer	The primary result from the Lung Cancer HRA. It is backwards compatible with LungCancerAware from HealthAware but NOT the Lung Cancer HRA from Medicom Health due to scientific improvements.	'recommended'	Screening May Be Recommended
		'not_recommended_smoker'	Screening Not Currently Recommended
		'discuss'	Discuss Screening with a Doctor
		'not_recommended_quit'	Former Smoker -- Screening Not Recommended
		'not_recommended_young'	Discuss Screening at Age 50
		'not_recommended_old'	Screening Not Recommended Due to Age
		'not_recommended_never'	Never Smoked -- Screening Not Recommended
Peripheral Artery Disease	The primary result from the Peripheral Artery Disease HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.	'recommended_symptomatic'	Seek Medical Attention Soon
		'recommended'	Screening Recommended
		'info_needed'	More Information Needed
		'not_recommended'	No Screening Recommended
Prostate Cancer	The primary result from the Prostate Cancer HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.	'existing_pca'	Follow Your Doctor's Recommendation
		'has_existing_screening_plan'	Follow Your Existing Plan
		'discuss_screening'	Discuss Screening Options
		'discuss_screening_at_age_forty'	Discuss Screening Options at Age 40
		'discuss_screening_at_age_fortyfive'	Discuss Screening Options at Age 45
		'discuss_screening_at_age_fifty'	Discuss Screening Options at Age 50
Shoulder & Elbow	The primary result from the Unlock Shoulder & Ell	'no_symptoms'	No Significant {joint} Symptoms
		'mild_symptoms'	Mild to Moderate {joint} Symptoms
		'moderate_symptoms'	Moderate to Severe {joint} Symptoms
		'severe_symptoms'	Severe {joint} Symptoms
Sleep	The primary result from the Sleep HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.	'high_risk'	High Sleep Apnea Risk
		'low_risk'	Low Sleep Apnea Risk
		'unknown_risk'	Unknown Risk for Sleep Apnea
Stroke	The primary result from the Stroke HRA. It is backwards compatible with HealthAware. For Medicom Health HRA, the data types are also the same, but the label used within the HRA for 'HIGH2' was previously Very High Risk. This was changed HealthAware and Unlock HRAs to clarify that it is tied to an existing condition.	'high2'	High Risk - Existing Condition
		'high1'	High Risk
		'moderate'	Moderate Risk
		'low'	Low Risk
Substance Use	The primary result from the Substance Use HRA.	'seek_immediate_help'	Get Confidential Help Today

		'evaluation_recommended'	See a Health Care Professional
		'learn_about_treatment'	Learn More About Treatment Options
		'notify_pcp_of_future_changes'	Tell a Health Care Provider If Things Change
Weight	The primary result from the Weight HRA.	'possible_surgery_candidate'	Possible Surgery Candidate
		'screening_needed'	Screening Needed to Determine Eligibility
		'weight_loss_recommended'	Weight Loss Recommended
		'recommend_qol_followup'	Recommend "Quality of Life" Follow-up
		'weight_loss_may_be_recommended'	Weight Loss May Be Recommended
		'weight_loss_not_recommended'	Weight Loss Not Recommended

WebMD Ignite Integration Data Guide

The WebMD Ignite Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Health Aware HRAs vs. Medicom Health HRAs, etc.). All data is written to the Activity API with a new Activity object created for each HRA completion. For more information about this integration, please refer to the "WebMD Ignite - Unlock HRAs Integration" document.

HRA Primary Results - Medicom Health Specific
