

# Salesforce Health Cloud Integration Data Guide

The Salesforce Health Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion. For more information about this integration, please refer to the "SF Health Cloud - Unlock HRAs Integration" document.

## Lead Standard Fields

Lead Standard Fields are fields that are part of the standard Lead Object in Salesforce. These fields will always populate if they are available and require no additional configuration. These fields are provided for all HRAs.

Salesforce Lead Standard Field Name	Salesforce Field Type	HRA Families	Unlock/HealthAware Field Name	Medicom Field Name	Expected Values	Description
FirstName	Name	All	firstName	firstName	1-50 character first name	The first name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
LastName	Name	All	lastName	lastName	1-50 character last name	The last name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
Street	Text (Address Compound Field)	All	address	address1	address	The street address of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
City	Text (Address Compound Field)	All	city	city	city name	The city of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
StateCode	Picklist (Address Compound Field)	All	state	state	2 letter state initial in uppercase, ISO format ex: 'MN'	The 2 character state abbreviation of the US state for the consumer. Based on client customization, this field may be optional or hidden. The integration checks for StateCode first to determine if State and Country picklists have been enabled and if so, writes to the StateCode field, otherwise it adds the 2 letter state code into the state field directly.
State (used if StateCode is not available)	Text (Address Compound Field)					
PostalCode	Text (Address Compound Field)	All	zipCode	zipCode	5 digit string	The 5 digit zip code of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
CountryCode	Picklist (Address Compound Field)	All	country	country	US	The country of the consumer. This is always configured as US because all HRAs are for US audience only. The integration checks for CountryCode first to determine if State and Country picklists have been enabled and if so, writes to the CountryCode field, otherwise it adds the 2 letter country code into the country field directly.
Country (used if CountryCode is not available)	Text (Address Compound Field)					
Phone	Phone	All	phone	phone1	10 digit string	The 10 digit phone number of the consumer (US based number assumed). Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
Email	Email	All	email	email	email address	The email address of the consumer.
LeadSource	Picklist	All				This is a static value that can be set during the integration setup. The Lead Source value is not required, but we recommend setting this to a known picklist value that represents the HRAs. Use the API name for the picklist option when setting this value.
Company	Text	All				This is a static value that can be set during the integration setup. The Company value is not required. This is available for special client use-cases where the Company value is required to be set.

# Salesforce Health Cloud Integration Data Guide

The Salesforce Health Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion. For more information about this integration, please refer to the "SF Health Cloud - Unlock HRAs Integration" document.

## Lead Custom Fields

Lead Custom Fields are fields that can be added to the Lead Object in Salesforce by a Salesforce System Administrator. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.

HRA Data Name	HRA Families	Salesforce Lead Custom Field Name(s)	Salesforce Field	Expected Data Values	Data Label	Description
dateOfBirth	All	Unlock_DOB__c Medicom_DOB__c HealthAware_DOB__c BirthDate__c (Health Cloud Standard)	Date	Date of birth as a date		The date of birth of the consumer. <b>Note: This will be written to the Health Cloud standard BirthDate__c field unless you add one of the other custom field names ahead of it.</b>
age	All	Unlock_Age__c Medicom_Age__c HealthAware_Age__c Age__c	Number (2,0)	Age value as an integer		The age of the consumer when the HRA was completed.
sex	All	Unlock_Sex_At_Birth__c Sex_At_Birth__c HealthAware_Gender__c (Supported for legacy) Medicom_Gender__c (Supported for legacy) Gender__c (Supported for legacy)	Text	'FEMALE' 'MALE'		The consumer's sex at birth. This should not be confused with gender. The Gender field names are still supported for continuity, but the data captured within the HRA is "Sex at Birth" and should not be used for any gender identity purposes.
marketingOptIn	All	Unlock_Marketing_Opt_In__c Medicom_OptIn__c HealthAware_OptIn__c Source_Opt_In__c HasOptedOutOfEmail	Checkbox	Unchecked = false Checked = true  <i>HasOptedOutOfEmail is inverted when sent to align with intent</i>		Indicates if the consumer has opted-in to receive email marketing communications. If this option is not included in the HRA, the value is set based on parameters in the HRA Legal and Compliance section.
phoneOptIn	All	Unlock_Phone_OptIn__c Medicom_Phone_OptIn__c HealthAware_Phone_OptIn__c	Checkbox	Unchecked = false Checked = true		Indicates if the consumer has opted-in to receive a phone call about their results. If this option is not included in the HRA, the value is set based on
reportOptIn	All	Unlock_EmailReport__c Medicom_EmailReport__c HealthAware_EmailReport__c	Checkbox	Unchecked = false Checked = true		Indicates if the consumer has opted-in to receive their result report emailed to them.
source	All	Unlock_Source__c Medicom_Source__c HealthAware_Source__c UTM_Source__c	Text	String from URL		This is the data that was passed to the HRA in the utm_source parameter. For Medicom HRAs, the s parameter is also able to be used.
medium	All	Unlock_Medium__c Medicom_Medium__c HealthAware_Medium__c UTM_Medium__c	Text	String from URL		This is the data that was passed to the HRA in the utm_medium parameter.
campaign	All	Unlock_Campaign__c Medicom_Campaign__c HealthAware_Campaign__c UTM_Campaign__c	Text	String from URL		This is the data that was passed to the HRA in the utm_campaign parameter.
language	All	Unlock_Language__c Medicom_Language__c HealthAware_Language__c Language__c	Text	'en' for English 'es_US' for Spanish		Indicates the language that the consumer chose to complete the HRA with.
firstName_caregiver	HealthAware, Unlock	Unlock_Caregiver_First_Name__c HealthAware_Caregiver_First_Name__c	Name	1- 50 character first name		The first name of the caregiver who completed this HRA on behalf of the consumer.
lastName_caregiver	HealthAware, Unlock	Unlock_Caregiver_Last_Name__c HealthAware_Caregiver_Last_Name__c	Name	1-50 character last name		The last name of the caregiver who completed this HRA on behalf of the consumer.
ethnicity_ethnicity	Medicom	Ethnicity__c	Text/Picklist	'WHITE' 'AFRICAN' 'HISPANIC'	White African American Hispanic/Latino	The ethnicity of the consumer from Medicom HRAs.

				'ASIAN_PACIFIC_ISLANDER'	Asian or Pacific Islander	
				'AMERICAN_INDIAN'	American Indian/Alaska Native	
				'OTHER'	Other	
				'NO_ANSWER'	Unknown/no answer	
ethnicity_simple	HealthAware, Unlock	Unlock_Ethnicity__c HealthAware_Ethnicity__c	Text/Picklist	'WHITE'	White	The ethnicity of the consumer from Unlock and Healthware HRAs that are configured to use simple ethnicity.
				'AFRICAN_AMERICAN'	Black or African American	
				'HISPANIC'	Hispanic or Latino	
				'ASIAN'	Asian	
				'NATIVE_AMERICAN'	American Indian or Alaska Native	
				'PACIFIC_ISLANDER'	Native Hawaiian or Other Pacific Islander	
				'OTHER'	Other	
				'NO_ANSWER'	Unknown/no answer	
race_detailed	HealthAware, Unlock	Unlock_Race__c HealthAware_Race__c	Text/Picklist	'WHITE'	White	The race of the consumer from Unlock and Healthware HRAs that are configured to use detailed ethnicity. This format aligns with US Census format.
				'AFRICAN_AMERICAN'	Black or African American	
				'ASIAN'	Asian	
				'NATIVE_AMERICAN'	American Indian or Alaska Native	
				'PACIFIC_ISLANDER'	Native Hawaiian or Other Pacific Islander	
				'OTHER'	Other	
				'NO_ANSWER'	Unknown/no answer	
ethnicOrigin_detailed	HealthAware, Unlock	Unlock_EthnicOrigin__c HealthAware_EthnicOrigin__c	Text/Picklist	'NON_HISPANIC'	Not Hispanic or Latino	The ethnic origin of the consumer from Unlock and Healthware HRAs that are configured to use detailed ethnicity. This format aligns with US Census format.
				'HISPANIC'	Hispanic or Latino	
				'NO_ANSWER'	Unknown/no answer	
ethnicity_legacy	HealthAware, Unlock	Ethnicity__c	Text/Picklist	'WHITE'	White	The ethnicity questions from HealthAware or Unlock HRAs converted into the Medicom legacy format. If detailed ethnicity is used, an Ethnic Origin of Hispanic overrides Race to consolidate to legacy fields. This field was created for continuity for clients who are migrating from Medicom HRAs to Unlock HRAs.
				'AFRICAN'	African American	
				'HISPANIC'	Hispanic/Latino	
				'ASIAN_PACIFIC_ISLANDER'	Asian or Pacific Islander	
				'AMERICAN_INDIAN'	American Indian/Alaska Native	
				'OTHER'	Other	
				'NO_ANSWER'	Unknown/no answer	
tobaccoUse	HealthAware, Unlock	Unlock_SmokingStatus__c Medicom_SmokingStatus__c HealthAware_SmokingStatus__c	Text/Picklist	'NEVER'	Never Smoked	The tobacco use status of the consumer from Unlock and Healthware HRAs.
				'FORMER_MORE'	Quit smoking (more than 1 year)	
				'FORMER_LESS'	Quit smoking (less than 1 year)	
				'CURRENT'	Smoked within 30 days	
				"	(not answered)	
smoker	Medicom	Medicom_SmokingStatus__c	Text/Picklist	'NEVER'	Never Smoked	The tobacco use status of the consumer from Medicom HRAs.
				'FORMER_MORE'	Quit smoking (more than 1 year)	
				'FORMER_LESS'	Quit smoking (less than 1 year)	
				'CURRENT'	Smoked within 30 days	
				"	(not answered)	
primaryCarePhysician_has	HealthAware, Unlock	Unlock_PCP__c HealthAware_PCP__c	Text/Picklist	'YES'	Yes	The consumer's answer to "Do you have a (primary care name)?" where the label is customizable, but the default is primary care physician. Different from Medicom format because of a new "I don't know" option.
				'NO'	No	
				'UNKNOWN'	I don't know	
existingPatient_pcp	HealthAware, Unlock	Unlock_Existing_Patient_PCP__c HealthAware_Existing_Patient_PCP__c	Text/Picklist	'YES'	Yes	If the consumer answered yes to having a primary care physician, they are asked if the provider is part of the client's organization. This is the answer to that question.
				'NO'	No	
primaryCarePhysician_has	Medicom	Medicom_PCP__c	Text/Picklist	'YES'	Yes	The consumer's answer to "Do you have a primary care physician?"
				'NO'	No	
primaryCarePhysician_visited	Medicom	Medicom_PCP_visited__c	Text/Picklist	'LESS_THAN_ONE_YEAR'	Less than 1 year ago	The consumer's answer to a question about the last time they visited their primary care physician for a checkup.
				'MORE_THAN_ONE_YEAR'	1 to 2 years ago	
				'MORE_THAN_TWO_YEARS'	More than 2 years ago	
				""	N/A (primaryCarePhysician_has =	
specialist_has	HealthAware, Unlock	Unlock_Specialist__c HealthAware_Specialist__c	Text/Picklist	'YES'	Yes	The consumer's answer to "Do you have a (specialist)?" where the specialist label is customizable.
				'NO'	No	
				'UNKNOWN'	I don't know	

existingPatient_specialist	HealthAware, Unlock	Unlock_Existing_Patient_Specialist__c HealthAware_Existing_Patient_Specialist__c	Text/Picklist	'YES' 'NO'	Yes No	If the consumer answered yes to having a specialist, they are asked if the specialist is part of the client's organization. This is the answer to that question.
bmi	All	Unlock_BMI__c Medicom_BMI__c HealthAware_BMI__c	Number(3,1)	Decimal value representing		This is the consumer's calculated BMI based on their answers.
height	All	Unlock_Height__c Medicom_Height__c HealthAware_Height__c	Number(2,0)	Integer value between 48 and		This is the consumer's height in inches when they completed the HRA.
weight	All	Unlock_Weight__c Medicom_Weight__c HealthAware_Weight__c	Number(3,0)	Integer value between 80 and		This is the consumer's weight in pounds when they completed the HRA.
connectionId	All	Unlock_Connection_ID__c Medicom_Connection_ID__c HealthAware_Connection_ID__c External_Unique_ID__c	Text	UUID value unique to that		This is a universally unique ID that represents the consumer's HRA usage session. This can be used as an external ID value.
portalName	All	Unlock_Portal_Name__c Medicom_Portal_Name__c HealthAware_Portal_Name__c	Text	A string of the name of the		This is the Client Organization name shown in the HRA Console.
location	All	Unlock_Location__c Medicom_Location__c HealthAware_Location__c	Text	A string of the name of the		This is the location name shown in the HRA Console.
hra_url	HealthAware, Unlock	Unlock_HRA_URL__c HealthAware_HRA_URL__c	Text	A string of the URL of the		This is the URL of the HRA assessment completed by the consumer.
report_url	HealthAware, Unlock	Unlock_Report_URL__c HealthAware_Report_URL__c	Text	A string of the URL of the		This is the URL of the completed HRA's HTML Results Report.
cta1_phone	HealthAware, Unlock	Unlock_CTA1_Phone__c HealthAware_CTA1_Phone__c	Phone	10 digit string		The phone number provided in CTA1 (the call-back option in the Engagement Queue), where CTA1 represents the first CTA displayed in the sequence of three possible CTAs.
cta2_phone	HealthAware, Unlock	Unlock_CTA2_Phone__c HealthAware_CTA2_Phone__c	Phone	10 digit string		The phone number provided in CTA2 (the call-back option in the Engagement Queue), where CTA2 represents the second CTA displayed in the sequence of three possible CTAs.
cta3_phone	HealthAware, Unlock	Unlock_CTA3_Phone__c HealthAware_CTA3_Phone__c	Phone	10 digit string		The phone number provided in CTA3 (the call-back option in the Engagement Queue), where CTA3 represents the last CTA displayed in the sequence of three possible CTAs.
cta1_phoneOptIn	HealthAware, Unlock	Unlock_CTA1_Phone_Opt_In__c HealthAware_CTA1_Phone_Opt_In__c	Checkbox	Unchecked = false Checked = true		Boolean value showing if the user opted in to phone communications when submitting their phone number in CTA1 — the call-back (Engagement Queue) option presented first among three possible CTAs.
cta2_phoneOptIn	HealthAware, Unlock	Unlock_CTA2_Phone_Opt_In__c HealthAware_CTA2_Phone_Opt_In__c	Checkbox	Unchecked = false Checked = true		Boolean value showing if the user opted in to phone communications when submitting their phone number in CTA2 — the call-back (Engagement Queue) option presented second among three possible CTAs.
cta3_phoneOptIn	HealthAware, Unlock	Unlock_CTA3_Phone_Opt_In__c HealthAware_CTA3_Phone_Opt_In__c	Checkbox	Unchecked = false Checked = true		Boolean value showing if the user opted in to phone communications when submitting their phone number in CTA3 — the call-back (Engagement Queue) option presented last among three possible CTAs.
cta1_callCaregiver	HealthAware, Unlock	Unlock_CTA1_Call_Caregiver__c HealthAware_CTA1_Call_Caregiver__c	Checkbox	Unchecked = false Checked = true		Boolean value indicating if the user chose to supply a caregiver's phone number for the call-back when completing CTA1, the first of three possible CTAs (Engagement Queue option).

cta2_callCaregiver	HealthAware, Unlock	Unlock_CTA2_Call_Caregiver__c HealthAware_CTA2_Call_Caregiver__c	Checkbox	Unchecked = false Checked = true		Boolean value indicating if the user chose to supply a caregiver's phone number for the call-back when completing CTA2, the second of three possible CTAs (Engagement Queue option).
cta3_callCaregiver	HealthAware, Unlock	Unlock_CTA3_Call_Caregiver__c HealthAware_CTA3_Call_Caregiver__c	Checkbox	Unchecked = false Checked = true		Boolean value indicating if the user chose to supply a caregiver's phone number for the call-back when completing CTA3, the last of three possible CTAs (Engagement Queue option).
cta1_dataName	HealthAware, Unlock	Unlock_CTA1_Data_Name__c HealthAware_CTA1_Data_Name__c	Text	A string of the data name for		The data name given to CTA1, the first of three possible CTAs.
cta2_dataName	HealthAware, Unlock	Unlock_CTA2_Data_Name__c HealthAware_CTA2_Data_Name__c	Text	A string of the data name for		The data name given to CTA2, the second of three possible CTAs.
cta3_dataName	HealthAware, Unlock	Unlock_CTA3_Data_Name__c HealthAware_CTA3_Data_Name__c	Text	A string of the data name for CTA 3.		The data name given to CTA3, the last of three possible CTAs.
cta1_completed	HealthAware, Unlock	Unlock_CTA1_Completed__c HealthAware_CTA1_Completed__c	Checkbox	Unchecked = false Checked = true		Boolean value indicating whether the user clicked CTA1 (standard CTA) or submitted information for CTA1 (Engagement Queue CTA). Represents the first of three possible CTAs.
cta2_completed	HealthAware, Unlock	Unlock_CTA2_Completed__c HealthAware_CTA2_Completed__c	Checkbox	Unchecked = false Checked = true		Boolean value indicating whether the user clicked CTA2 (standard CTA) or submitted information for CTA2 (Engagement Queue CTA). Represents the second of three possible CTAs.
cta3_completed	HealthAware, Unlock	Unlock_CTA3_Completed__c HealthAware_CTA3_Completed__c	Checkbox	Unchecked = false Checked = true		Boolean value indicating whether the user clicked CTA3 (standard CTA) or submitted information for CTA3 (Engagement Queue CTA). Represents the last of three possible CTAs.
custom_<custom question data name> (ex: custom_data_name)	HealthAware, Unlock	Unlock_<custom_data_name>__c HealthAware_<custom_data_name>__c <i>Note: data name in brackets exactly matches what is entered in the customization; the brackets are not part of the field name</i>	Depends on the custom question	Depends on the custom question	The custom question answer. You will need to add a field for each custom question you want to receive data for.	The custom question text as configured in the customization

# Salesforce Health Cloud Integration Data Guide

The Salesforce Health Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion. For more information about this integration, please refer to the "SF Health Cloud - Unlock HRAs Integration" document.

## Lead Custom Fields - Unlock HRA Specific

Lead Custom Fields are fields that can be added to the Lead Object in Salesforce by a Salesforce System Administrator. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.

HRA Data Name	Salesforce Lead Custom Field Name(s)	Salesforce Field Type	Expected Data Values	Data Label	Description
appType	Unlock_AppType__c	Text/Picklist	Acid Reflux Anxiety Back & Neck Bladder Control Breast Cancer Breast Cancer - Spanish Colon Cancer COPD Depression Diabetes Diabetes - Spanish Healthy Weight-Range Heart Heart - Spanish Knee & Hip Lung Cancer Peripheral Artery Disease Prostate Cancer Shoulder & Elbow Sleep Stroke Substance Use Weight Loss	Acid Reflux Anxiety Back & Neck Bladder Control Breast Cancer Breast Cancer - Spanish Colon Cancer COPD Depression Diabetes Diabetes - Spanish Healthy Weight-Range Heart Heart - Spanish Knee & Hip Lung Cancer Peripheral Artery Disease Prostate Cancer Shoulder & Elbow Sleep Stroke Substance Use Weight Loss	This is the type of HRA that was completed by the consumer.
primaryResult (from Acid Reflux HRA)	Unlock_AcidReflux_PrimaryResult__c Medicom_AcidReflux_PrimaryResult__c HealthAware_Gerd_PrimaryResult__c	Text/Picklist	'SERIOUS_SYMPTOMS_REPORTED' 'DIAGNOSED_SYMPTOMATIC' 'UNDIAGNOSED_INCREASEDRISK' 'UNDIAGNOSED_SYMPTOMATIC' 'DIAGNOSED_ASYMPTOMATIC' 'UNDIAGNOSED_ASYMPTOMATIC'	Seek Medical Attention See a Doctor About Symptom Control See a Doctor for Evaluation Ask a Doctor About Your Symptoms Symptoms Well-Controlled GERD Not Likely	The primary result from the Acid Reflux HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
primaryResult (from Anxiety HRA)	Unlock_Anxiety_PrimaryResult__c Medicom_Anxiety_PrimaryResult__c HealthAware_Anxiety_PrimaryResult__c	Text/Picklist	'RECOMMENDED' 'NOT_RECOMMENDED_SYMPTOMATIC' 'NOT_RECOMMENDED_ASYMPTOMATIC'	Anxiety assessment recommended Tell a doctor about your symptoms Keep a symptom journal	The primary result from the Anxiety HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
backNeckPrimaryResult (from Back & Neck HRA)	Unlock_Spine_PrimaryResult__c Medicom_Spine_PrimaryResult__c HealthAware_Spine_PrimaryResult__c	Text/Picklist	'NO_IMPAIRMENT' 'MILD_IMPAIRMENT' 'MODERATE_IMPAIRMENT' 'SEVERE_IMPAIRMENT' 'OTHER_SYMPTOMS_REPORTED' 'INCONTINENCE_SYMPTOMS' 'MENINGITIS_OR_HEART_SYMPTOMS'	No Spine Impairment Mild Spine Impairment Moderate Spine Impairment Severe Spine Impairment See a Doctor Soon Seek Medical Attention Seek Immediate Medical Attention	The primary result from the Back & Neck HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
primaryResult (from Bladder Control HRA)	Unlock_Bladder_PrimaryResult__c Medicom_Bladder_PrimaryResult__c HealthAware_Bladder_PrimaryResult__c	Text/Picklist	'HAS_WORRISOME_URINARY_SYMPTOMS' 'GREATLY_BOTHERED_BY_STRESS_LEAKS' 'HAS_URGE_OR_STRESS_LEAKS_OR_FREQUENT_URINATION' 'HAS_LEAKS_NOT_RELATED_TO_URGE_OR_STRESS' 'NO_LEAKS_OR_FREQUENT_URINATION'	Prompt Medical Evaluation Recommended Treatable Control Problems Identified Treatable Bladder Problems Identified A Medical Evaluation Is Needed No Bladder Control Problems Reported	The primary result from the Bladder Control HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
primaryResult (from Breast Cancer HRA)	Unlock_BreastCancer_PrimaryResult__c Medicom_Bcscreeing_PrimaryResult__c HealthAware_BreastCancer_PrimaryResult__c	Text/Picklist	'GENETIC_SCREENING_RECOMMENDED' 'GENETIC_RESCREENING_RECOMMENDED' 'SCREENING_RECOMMENDED' 'FOLLOW_RECOMMENDED_SCREENING' 'DISCUSS_FUTURE_SCREENING' 'CONTINUE_ANNUAL_SCREENING' 'CONTINUE_RECOMMENDED_SCREENING'	Screening for Genetic Risk Factors Recommended Re-screening for Genetic Risk Factors Recommended Schedule Screening Now Follow Your Doctor's Recommended Screening Schedule Ask Your Doctor When You Should Begin Screening Continue Annual Screening Continue Recommended Screening Schedule	The primary result from the Breast Cancer HRA. It is backwards compatible with BreastCancerAware from HealthAware and the Breast Cancer Screening HRA from Medicom Health, but NOT the deprecated Breast Cancer Risk HRA from Medicom Health.
primaryResult (from Colon Cancer HRA)	Unlock_Colon_PrimaryResult__c HealthAware_Colon_PrimaryResult__c	Text/Picklist	'MONITORING_REC_EXISTING_CRC' 'DISCUSS_SYMPTOMS' 'DISCUSS_SCREENING_SCHEDULE' 'SCHEDULE_ROUTING_SCREENING_NOW' 'CONTINUE_ROUTINE_SCREENING' 'ABOVE_REC_SCREENING_AGE'	Personal Cancer History - Monitoring Recommended Discuss Symptoms with a Doctor Discuss Screening Schedule with a Doctor Schedule Routine Screening Now Continue Routine Screening Above Recommended Age for Screening	The primary result from the Colon Cancer HRA. It is backwards compatible with ColonCancerAware from HealthAware but NOT the Colon Cancer HRA from Medicom Health due to scientific improvements.

primaryResult (from COPD HRA)	Unlock_COPD_PrimaryResult__c HealthAware_COPD_PrimaryResult__c	Text/Picklist	'BELOW_REC_SCREENING_AGE' 'MANAGE_EXISTING_COPD' 'DISCUSS_EXISTING_COPD' 'SCREENING_RECOMMENDED' 'SCREENING_MAY_BE_RECOMMENDED' 'DISCUSS_SYMPTOMS'	Below Recommended Age for Screening Manage Your COPD With Your Doctor Talk to a Doctor About Your COPD Screening Recommended Screening May Be Recommended Tell a Doctor About Any Symptoms	The primary result from the COPD HRA. It is backwards compatible with the COPDAware HRA from HealthAware. Medicom Health does not have a compatible HRA.
primaryResult (from Depression HRA)	Unlock_Depression_PrimaryResult__c Medicom_Depression_PrimaryResult__c HealthAware_Depression_PrimaryResult__c	Text/Picklist	'RECOMMENDED' 'NOT_RECOMMENDED_SYMPTOMATIC' 'NOT_RECOMMENDED_ASYMPTOMATIC'	Depression Assessment Recommended Tell a Doctor About Your Symptoms Keep a Symptom Journal	The primary result from the Depression HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.
primaryResult (from Diabetes HRA)	Unlock_Diabetes_PrimaryResult__c HealthAware_Diabetes_PrimaryResult__c	Text/Picklist	'EXISTING_DIABETES' 'VERY_HIGH_RISK' 'HIGH_RISK' 'MODERATE_RISK' 'MORE_INFO_NEEDED' 'LOW_RISK'	Existing diabetes Very high risk High risk Moderate risk More info needed Low risk	The primary result from the Diabetes HRA. It is backwards compatible with DiabetesAware from HealthAware but NOT the Diabetes HRA from Medicom Health due to scientific improvements.
overallHeartRisk (from Heart HF HRA)	Unlock_Heart_PrimaryResult__c HealthAware_Heart_PrimaryResult__c	Text/Picklist	'EXISTING' 'HIGHNEARTERM' 'HIGHLONGTERM' 'MODERATE' 'INCREASED' 'LOW' 'UNKNOWN'	High Risk - Existing Condition High Near-term Risk High Long-term Risk Moderate Risk Increased Risk Low Risk Unknown Risk	The primary result from the Heart HRA. It is directly backwards compatible with HeartAware directly. A backwards-compatible option is also available for the Medicom Health Heart Health HRA data point for continuity. We strongly recommend upgrading to the new data type to benefit from additional stratification of the High Risk group.
medicomLegacyResult (from Heart HRA)	Medicom_Heart_PrimaryResult__c	Text/Picklist	'UNKNOWN' 'LOW' 'MODERATE' 'HIGH' 'VERY_HIGH'	Unknown Risk Low Risk Moderate Risk High Risk High Risk	Converted data delivered for continuity purposes. Note that the data set includes 'VERY_HIGH' but is only displayed to the user as High Risk for user experience reasons. This is likely to be deprecated in the future, so clients should be migrating to the data type above.
jointAssessment (from Knee & Hip HRA)	Unlock_KneeHip_PrimaryResult__c Medicom_KneeHip_PrimaryResult__c HealthAware_KneeHip_PrimaryResult__c	Text/Picklist	'NO_PROBLEMS' 'MILD_PROBLEMS' 'MODERATE_PROBLEMS' 'SEVERE_PROBLEMS'	No Significant (joint) Problems Mild to Moderate (joint) Symptoms Moderate to Severe (joint) Symptoms Severe (joint) Symptoms	The primary result from the Knee & Hip HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.
primaryResult (from Lung Cancer HRA)	Unlock_Lung_PrimaryResult__c HealthAware_Lung_PrimaryResult__c	Text/Picklist	'RECOMMENDED' 'NOT_RECOMMENDED_SMOKER' 'DISCUSS' 'NOT_RECOMMENDED_QUIT' 'NOT_RECOMMENDED_YOUNG' 'NOT_RECOMMENDED_OLD' 'NOT_RECOMMENDED_NEVER'	Screening May Be Recommended Screening Not Currently Recommended Discuss Screening with a Doctor Former Smoker -- Screening Not Recommended Discuss Screening at Age 50 Screening Not Recommended Due to Age Never Smoked -- Screening Not Recommended	The primary result from the Lung Cancer HRA. It is backwards compatible with LungCancerAware from HealthAware but NOT the Lung Cancer HRA from Medicom Health due to scientific improvements.
primaryResult (from Medical Weight Loss HRA)	Unlock_MedicalWeightLoss_PrimaryResult__c	Text/Picklist	'LIKELY_ELIGIBLE' 'POSSIBLY_ELIGIBLE' 'NOT_ELIGIBLE'	Likely Eligible Possibly Eligible Not Eligible	The primary result from the Medical Weight Loss HRA.
screeningRecommendation (from Peripheral Artery Disease HRA)	Unlock_PAD_PrimaryResult__c Medicom_PAD_PrimaryResult__c HealthAware_PAD_PrimaryResult__c	Text/Picklist	'RECOMMENDED_SYMPTOMATIC' 'RECOMMENDED' 'INFO_NEEDED' 'NOT_RECOMMENDED'	Seek Medical Attention Soon Screening Recommended More Information Needed No Screening Recommended	The primary result from the Peripheral Artery Disease HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.
primaryResult (from Prostate Cancer HRA)	Unlock_Prostate_PrimaryResult__c Medicom_Prostate_PrimaryResult__c HealthAware_Prostate_PrimaryResult__c	Text/Picklist	'EXISTING_PCA' 'HAS_EXISTING_SCREENING_PLAN' 'DISCUSS_SCREENING' 'DISCUSS_SCREENING_AT_AGE_FORTY' 'DISCUSS_SCREENING_AT_AGE_FORTYFIVE' 'DISCUSS_SCREENING_AT_AGE_FIFTY'	Follow Your Doctor's Recommendation Follow Your Existing Plan Discuss Screening Options Discuss Screening Options at Age 40 Discuss Screening Options at Age 45 Discuss Screening Options at Age 50	The primary result from the Prostate Cancer HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.
primaryResult (from Shoulder & Elbow HRA)	Unlock_ShoulderElbow_PrimaryResult__c	Text/Picklist	'NO_SYMPTOMS' 'MILD_SYMPTOMS' 'MODERATE_SYMPTOMS' 'SEVERE_SYMPTOMS'	No Significant (joint) Symptoms Mild to Moderate (joint) Symptoms Moderate to Severe (joint) Symptoms Severe (joint) Symptoms	The primary result from the Unlock Shoulder & Elbow HRA.
primaryResult (from Sleep HRA)	Unlock_Sleep_PrimaryResult__c Medicom_Sleep_PrimaryResult__c HealthAware_Sleep_PrimaryResult__c	Text/Picklist	'HIGH_RISK' 'LOW_RISK' 'UNKNOWN_RISK'	High Sleep Apnea Risk Low Sleep Apnea Risk Unknown Risk for Sleep Apnea	The primary result from the Sleep HRA. It is backwards compatible with both HealthAware and Medicom Health HRAs.
primaryResult (from Stroke HRA)	Unlock_Stroke_PrimaryResult__c HealthAware_Stroke_PrimaryResult__c Medicom_Stroke_PrimaryResult__c	Text/Picklist	'HIGH2' 'HIGH1' 'MODERATE' 'LOW'	High Risk - Existing Condition High Risk Moderate Risk Low Risk	The primary result from the Stroke HRA. It is backwards compatible with HealthAware. For Medicom Health HRA, the data types are also the same, but the label used within the HRA for 'HIGH2' was previously Very High Risk. This was changed HealthAware and Unlock HRAs to clarify that it is tied to an existing condition.
primaryResult (from Substance Use HRA)	Unlock_SubstanceUse_PrimaryResult__c	Text/Picklist	'SEEK_IMMEDIATE_HELP' 'EVALUATION_RECOMMENDED' 'LEARN_ABOUT_TREATMENT' 'NOTIFY_PCP_OF_FUTURE_CHANGES'	Get Confidential Help Today See a Health Care Professional Learn More About Treatment Options Tell a Health Care Provider if Things Change	The primary result from the Substance Use HRA.

primaryResult (from Weight HRA/ HealthAware_WeightLoss_PrimaryResult__c)	Unlock_WeightLoss_PrimaryResult__c	Text/Picklist	'POSSIBLE_SURGERY_CANDIDATE' 'SCREENING_NEEDED' 'WEIGHT_LOSS_RECOMMENDED' 'RECOMMEND_QOL_FOLLOWUP' 'WEIGHT_LOSS_MAY_BE_RECOMMENDED' 'WEIGHT_LOSS_NOT_RECOMMENDED'	Possible Surgery Candidate Screening Needed to Determine Eligibility Weight Loss Recommended Recommend "Quality of Life" Follow-up Weight Loss May Be Recommended Weight Loss Not Recommended	The primary result from the Weight HRA. It is directly backwards compatible with HeartAware directly. A backwards-compatible option is also available for the Medicom Health Weight-Loss Surgery HRA data point for continuity. We strongly recommend upgrading to the new data type to benefit from additional stratification of the 'NO' group.
medicomLegacyResult (from Weight HRA)	Medicom_WeightSurgery_PrimaryResult__c	Text/Picklist	'MORE_INFO' 'NO' 'YES'	More information needed to determine a recommendation You don't appear to be a candidate for surgery. You may be a candidate for weight-loss surgery.	Converted data delivered for continuity purposes. This is likely to be deprecated in the future, so clients should be migrating to the data type above.

## Salesforce Health Cloud Integration Data Guide

The Salesforce Health Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion. For more information about this integration, please refer to the "SF Health Cloud - Unlock HRAs Integration" document.

### Lead Custom Fields - HealthAware Specific

Lead Custom Fields are fields that can be added to the Lead Object in Salesforce by a Salesforce System Administrator. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.
