

Salesforce Marketing Cloud Integration Data Guide

The Salesforce Marketing Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion.

Lead Standard Fields

Lead Standard Fields are fields that are part of the standard Lead Object in Salesforce Marketing Cloud. These fields will always populate if they are available and require no additional configuration. These fields are provided for all HRAs.

Standard Field Name	Field Type	HRA Families	Unlock/HealthAware Field Name	Medicom Field Name	Expected Values	Description
First_Name	Name	All	first_name	first_name	1-50 character first name	The first name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
Last_Name	Name	All	last_name	last_name	1-50 character last name	The last name of the consumer. For HRAs that support caregivers answering on behalf of a person, it is NOT the name of the caregiver.
Address	Text	All	address1	address1 address2	address	The street address of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
City	Text	All	city	city	city name	The city of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
State	Text	All	state	state	2 letter state initial in uppercase, ISO format ex: 'MN'	The 2 character state abbreviation of the US state for the consumer. Based on client customization, this field may be optional or hidden.
Zip_Code	Text	All	zip_code	zip_code	5 digit string	The 5 digit zip code of the consumer. Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
Phone	Phone	All	phone	phone1	10 digit string	The 10 digit phone number of the consumer (US based number assumed). Based on client customization, this field may be optional or hidden. If it is hidden, it will be empty.
Email_Address	Text	All	email	email	email address	The email address of the consumer.
Client	Text	All	client	client	1-50 character company Name	
Connection_Id	Text	All	connection_id	connection_id	UUID value unique to that user's session.	The connectionId is a unique identifier for each HRA session. If the activity is re-submitted, the connectionId will be the same.
Date_Taken	String	All	created_at	created_at	Created Date as a string	An ISO formatted datetime string - when the activity started. Timezone should be in UTC
HRA_Type	String	All	app_type_name	app_type_name	Acid Reflux Profiler V3 Anxiety Profiler V3 Back & Neck Pain Profiler V3 Bladder Control Profiler V3 Breast Cancer Risk Profiler V3 Breast Cancer Screening Assessment V3 Colorectal Cancer Profiler V3 COVID-19 Symptoms Assessment V3 Depression Profiler V3 Diabetes Risk Profiler V3 Healthy Weight-Range Profiler V3 Heart Health Profiler V3 Knee & Hip Profiler V3 Lung Cancer Profiler V3 PAD Symptoms Profiler V3 Prostate Cancer Profiler V3 Sleep Apnea Profiler V3 Stroke Risk Profiler V3 Weight-Loss Surgery Profiler V3 AnxietyAware BladderAware BreastCancerAware ColonCancerAware COPDAware DepressionAware DiabetesAware	The name of the HRA

Salesforce Marketing Cloud Integration Data Guide

The Salesforce Marketing Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion.

Lead Custom Fields

Lead Custom Fields are fields that can be added to the Lead Object in Salesforce Marketing Cloud. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.

HRA Data Name	HRA Families	Custom Field Name(s)	Field Type	Expected Data Values	Data Label	Description
location	All	Location	Text	A string of the name of the HRA location		This is the location name shown in the HRA Console.

Salesforce Marketing Cloud Integration Data Guide

The Salesforce Marketing Cloud Integration is supported for all Unlock, Medicom, and HealthAware HRAs. See additional tabs for any special variations that are HRA family specific (e.g. Unlock HRAs vs. Medicom Health HRAs, etc.). All data is written to the Lead object with a new Lead object created for each HRA completion.

Lead Custom Fields - Unlock HRA Specific

Lead Custom Fields are fields that can be added to the Lead Object in Salesforce Marketing Cloud. These fields will be filled if they are available, but require additional set up by the client. Information is organized by HRA field name because we will look for multiple custom field names in order to store the data. Field names for parallel data types are aligned in order to easily migrate between HRA families.

HRA Data Name	Custom Field Name(s)	Field Type	Expected Data Values	Data Label	Description
primaryResult (from Acid Reflux HRA)	AcidRefluxPrimaryResult	Text	'SERIOUS_SYMPTOMS_REPORTED' 'DIAGNOSED_SYMPTOMATIC' 'UNDIAGNOSED_INCREASEDRISK' 'UNDIAGNOSED_SYMPTOMATIC' 'DIAGNOSED_ASYMPTOMATIC' 'UNDIAGNOSED_ASYMPTOMATIC'	Seek Medical Attention See a Doctor About Symptom Control See a Doctor for Evaluation Ask a Doctor About Your Symptoms Symptoms Well-Controlled GERD Not Likely	The primary result from the Acid Reflux HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
primaryResult (from Anxiety HRA)	AnxietyPrimaryResult	Text	'RECOMMENDED' 'NOT_RECOMMENDED_SYMPTOMATIC' 'NOT_RECOMMENDED_ASYMPTOMATIC'	Anxiety assessment recommended Tell a doctor about your symptoms Keep a symptom journal	The primary result from the Anxiety HRA. It is backwards compatible with both Medicom and HealthAware HRAs.
